

# EXPLORE WITH A MARS ROVER!

Mars Rovers drive across the surface of the red planet collecting information about the local environment and taking pictures to send back to Earth.

## EXPLORE YOUR OWN ENVIRONMENT!

Get down very low to the floor. Look around you. Take it all in as if it were an alien landscape. What can you notice about your environment? Look at the colours, the textures and the shapes.

If you made the Mars Rover with Sally in the craft activity, you could take that with you to help you explore. Look out for every tiny detail of your surroundings

## RECORD YOUR FINDINGS!

Draw some pictures or take some photos of what you find. Maybe make some notes as well!

We would love to see what you've discovered! Share your pictures on our gallery!!
