

SPREAD THE WORD!

Now you know all about eco homes and what we can do to be kind to the environment. Use your design skills to create a poster spreading the word!

You could tell people how to make the houses they already have more eco friendly.

Or you could make a poster to show off your brilliant new home, and how everyone else should make one too!

Either way, be sure to mention renewable energy, recycling, and the house's environmental impact.

Remember, posters need to stand out! Use lots of eye catching colours and clear wording to get your points across.

Spread the word further with our gallery! We want to see what you think is best about having an eco-home.
